SUMMARY

Computer Science & Engineering student at **NIT Manipur** with strong foundations in **Data Structures & Algorithms, OOP, DBMS, Computer Networks, and Software Engineering**. Skilled in **full-stack MERN development**, modern frontend engineering, and AI-integrated systems using **React.js, Node.js, MongoDB, Python, and JavaScript**. Experienced in building scalable academic platforms and intelligent image watermarking systems with machine learning-based integrity verification. Actively seeking software engineering internship opportunities to apply problem-solving, system design, and real-world development skills.

EXPERIENCE

Cyber Security Internship — CDAC Noida19 Aug 2024 - 3 Oct 2024

Virtual Internship | Ethical Hacking & Penetration Testing

SKILLS

Programming Languages: Python, C, C++, Java, JavaScript, HTML5, CSS3
Frameworks & Technologies: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Vite, Framer Motion
Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC
Tools & Platforms: Git, GitHub, JWT Authentication, REST APIs, MongoDB Atlas, VS Code
AI & ML: PyTorch, Machine Learning Fundamentals, Image Watermarking Systems
Soft Skills: Teamwork, Time Management, Leadership, Communication

PROJECTS

CSEducation — Full-Stack Academic Resource PlatformApril 2026

- Developed a production-grade **MERN stack academic portal** for semester-wise notes, PYQs, books, and reference resources.
- Implemented **JWT-based admin authentication** and protected dashboard workflows for secure resource management.
- Engineered scalable REST APIs using **Node.js, Express.js, MongoDB, and Mongoose** following clean MVC architecture.
- Built a responsive **React + Tailwind CSS frontend** with glassmorphism UI, Framer Motion animations, dark/light mode, and skeleton loaders.
- Designed structured routing and dynamic semester/subject resource navigation with optimized API-driven rendering.
- Implemented reusable React components, Axios-based API services, toast notifications, and protected admin routes.

AquaMark AI — Intelligent Image Watermarking PlatformFeb 2026

- Engineered a full-stack invisible image watermarking platform using **React, Vite, Node.js (Express), and Python**.
- Integrated a **PyTorch-based encoder-decoder inference pipeline** for watermark embedding and integrity verification.
- Implemented AI-powered watermark integrity verification with confidence-based classification for detecting **safe, corrupted, or absent watermarks**.
- Designed intelligent trust metrics reporting **BER, confidence score, PSNR, SSIM, and integrity probabilities**.
- Built responsive Embedding Studio and Verification Lab interfaces for real-time image testing and downloadable outputs.
- Architected backend AI integration through **Node.js-Python process communication** and modular inference handling.

Professional Developer PortfolioNov 2025

- Engineered a modern, responsive single-page application using clean HTML5, CSS3, and JavaScript.
- Implemented full responsive design and a professional dark-mode theme for optimal viewing across all devices.
- Integrated **Typed.js** for dynamic text effects and a professional aesthetic, enhancing user engagement.
- Documented technical skills, academic history, and projects semantically to maximize professional visibility.

EDUCATION

Bachelor of Technology in Computer Science & Engineering2023 – Present

National Institute of Technology, ManipurCGPA: 8.95/10

CERTIFICATIONS

- Virtual Internship on Ethical Hacking & Penetration Testing — CDAC Noida
- FLY-Scholar (Finding the Leader in You - Scholar) program — The Competitiveness Mindset Institute, USA
